Location	Berlin, Germany.

## Objective

Professional software development with 10 years of experience bringing products from concept to release in a variety of environments and companies.

Organizational and leadership skills garnered from multiple supervisory positions, including but not limited to: mentoring, appropriate delegation, flat organizational communication, task assignment & assistance.

Love challenges, clean code, concise documentation, clear communication and constructive feedback.

My biggest strengths are APIs, Containers, Cloud, Web, Microservices. Currently I like to use Go to build scalable and fault tolerant backend systems.

## Education

2007 - 2012 Belarusian State University of Informatics and Radioelectronics (Computer Science Bachelor's degree).

## Experience

### 12traits / Engineering Lead

*Berlin, Germany*

*January 2019 - Now*

- Architecting and developing a Cloud-native backend for a company product from scratch using Microservices, Go, Kubernetes.
- Collaborating with Data Science, UX/UI, Frontend teams on the product roadmap.

- Managing team of engineers.

## Wizeline / Engineering Manager

*Ho Chi Minh City, Vietnam*

*May 2018 - September 2018*

- Coordinate and direct projects, making detailed plans to accomplish goals and directing the integration of technical activities.
- Led > 100 technical interviews.
- Improving interview process, by preparing new on-site challenges.
- Running internal training programs.
- Projects bootstrapping.

## Wizeline / Senior Software Engineer

*Ho Chi Minh City, Vietnam*

*March 2017 - May 2018*

- Leading a team of engineers to build Facebook Messenger Bot, using Node.js for API, Wit.ai for NLU.
- Working with the DevOps team to build the most suitable testing / production environment using Docker, Kubernetes and AWS ECS.
- Same backend platform was used later for Google Home Voice Bot.
- Building Google Home Voice Bot with AWS Lambda and Serverless.
- Building Air Quality Google Action with Go, GCP and Dialogflow.
- Building a facial recognition office assistant using Go, Tensorflow. This project won a local hackathon in 2018.
- Held few internal and public tech talks: Microservices with Go, The Art of Git.

## Lazada / Senior Software Engineer

*Ho Chi Minh City, Vietnam*

*October 2014 - March 2017*

- Leading development subteam in DevOps team. Lazada has a huge Microservices-based architecture (>100 services) and it requires tools and processes to manage it, DevOps team is a very important team there, responsible for downtime-less deployments, testing environments on Kubernetes, CI / CD on Jenkins.
- Microservice Kit. Web and CLI project to create a new microservice based on a standard template, creates CI / CD jobs, assigns ports, adds middlewares, configures deployment. Golang, Docker, Kubernetes, Beanstalkd, Jenkins.
- Developed a tool for Data Migrations. Web tool to run data migrations / fixtures for deployments. Golang, MySQL.

## Tuffle / Senior Fullstack Engineer

*Minsk, Belarus*

*November 2012 - September 2014*

Managing a team of 6 engineers to build a social network platform. I was responsible for the whole application lifecycle: APIs, Testing, Infrastructure. Technologies we used: PHP, MySQL, MongoDB, Memcached, Nginx.

## iTechArt / Software Engineer

*Minsk, Belarus*

*August 2010 - October 2012*

I was working in the Backend team providing services for clients. At that time I mostly used PHP and it's frameworks such as Zend Framework. Was working on security optimizations for web projects, protecting the system from SQL injections, CSRF, XSS.
